THESE ARE HERE IN THE C

Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

- 1 A " " following a place name indicates that the place is coterminous with a MCD. A "MCD" indicates that the place is also a place MCD; the place MCD name is not shown.
- 2 This map shows tribal census tract boundaries and numbers within the subject entity; nontribal census tract boundaries are shown outside of the subject entity. The number of the census tract is the same as the census tract number of the census tract defined within a federally recognized American Indian reservation or off-reservation trust land for the purpose of providing data based on an American Indian hierarchy rather than by state and county. Where reservation boundaries do not coincide with state and county boundaries, the tribal census tract number may be assigned on both sides of the boundary, and, if so, constitutes a single tribal census tract entity.
- 3 Following a block number indicates that the block number is repeated elsewhere in the block.
